About One Identity Defender AD FS Adapter

Defender AD FS Adapter integrates with Microsoft Active Directory Federation Services (AD FS) 3.0 and 4.0 to add two-factor authentication to services using browser-based federated logins. Defender AD FS Adapter supports relying parties that use Microsoft WS-Federation protocol, like Office 365, as well as SAML 2.0 federated logons for cloud apps like Google Apps and salesforce.com.

Resolved issues

The following is a list of issues addressed in this release.

Table 1: General resolved issues

Resolved Issue	Issue ID
When Users authenticate to Outlook Web Access using Defender AD FS Adapter, delay is observed in authentication and login to OWA fails.	244904
During diagnostic logging, unwanted error messages appear in AD FS Adapter log files.	251512
SMTP domains are not supported by Defender AD FS Adapter.	79900

Known issues

The following is a list of issues known to exist at the time of release.

Table 2: Known issues

Known issue	Issue ID
<p>When a user using their GrIDSure token authenticates using the Defender ADFS Adapter, they are unable to reset the PIP. This can happen if the user has other tokens assigned to them besides the GrIDSure token.</p> <p>Workaround: Make sure that no other tokens are assigned to the user, if they are using the GrIDSure token for authentication.</p>	21334
<p>When a user tries to authenticate using the Defender ADFS Adapter, they may get an ambiguous error "Access denied - no valid route found." This error may appear if the user does not have any Defender tokens assigned to them.</p> <p>Workaround: Make sure that the user in question has a Defender token assigned.</p>	21146
<p>When a user tries to authenticate using the Defender ADFS Adapter, they may get the error "Incorrect user ID or password. Type the correct user ID and password, and try again.", even though they are entering a correct username and password. This may occur if the security policy set up in Defender is preventing the user to log in at this time.</p> <p>Workaround: Check the security policy for the access node in question to</p>	5258

make sure that the problem is, in fact, that the login policy is preventing the user to log in at this time.

System requirements

You can install Defender AD FS Adapter on physical computers or virtual machines.

Table 3: System requirements

Requirement	Details
Processor	1.4 GHz or faster, x64 architecture
Memory (RAM)	4 GB
Hard disk space	50 MB or more
Operating system	One of the following operating systems: <ul style="list-style-type: none">• Windows Server 2012 R2• Windows Server 2016• Windows Server 2019

Before installing Defender AD FS Adapter, verify the following prerequisites:

- Microsoft .NET Framework 4.5.2 or later is installed
- Defender Client SDK 5.9.3 or later is installed
- AD FS role is installed and the AD FS service is running
- PowerShell 4.0 or later is installed
- The federated logins to the relying parties are configured and working
