One Identity Manager Language Packs

By default, One Identity Manager provides support for two languages - English and German. However, the web portal can be displayed in additional languages, based on the current browser language being used.

This guide contains the information required to localize One Identity Manager and Data Governance Edition deployments. It is intended for network administrators, consultants, and any other IT professionals using the product.

Prerequisites

- One Identity Manager Language Pack .CSV files that contain the localized files
- One Identity Manager Designer
- *One Identity Manager Installation Guide*
- *One Identity Manager Configuration Guide*

NOTE: The complete localization package can be found on the One Identity Manager download page on the Support Portal (<https://support.oneidentity.com/identity-manager/download-new-releases>).

Importing language files into One Identity Manager

The import process:

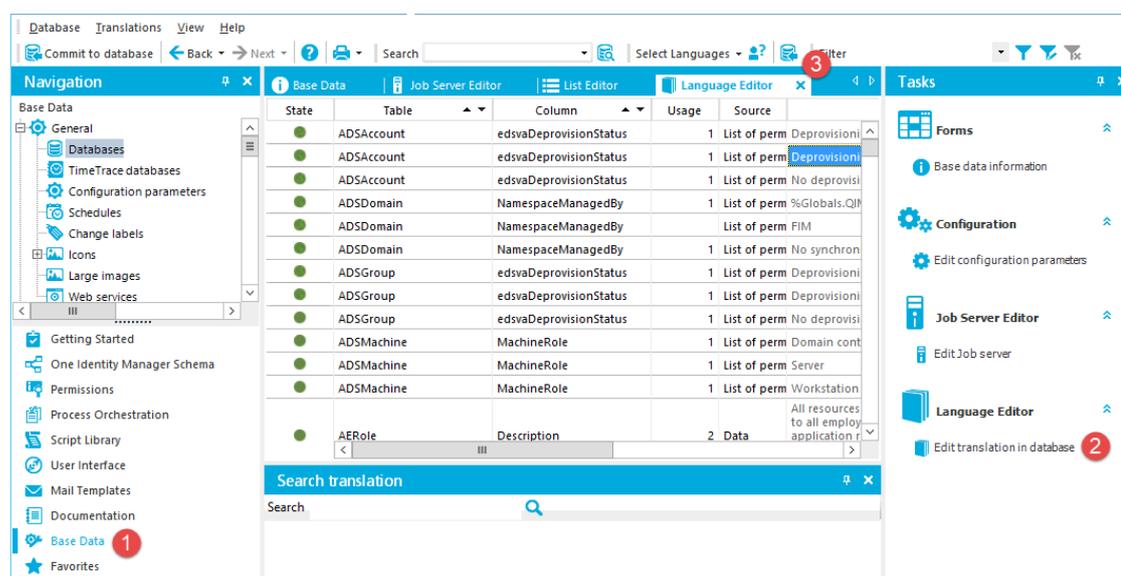

- creates new entries in the "DialogMultilanguage" table.
- updates existing entries (search based on columns Table, Column and Key) in table "DialogMultilanguage".
- does not delete any files.

To import the files using the Designer

1. In the lower pane of the navigation view, select **Base Data**.
2. In the **Language Editor Task** pane (far right pane), select the **Edit translation in database**.

The **Language Editor** appears.

3. Click the  **Import** toolbar button.

4. Navigate to the required .csv language file, and click **Open**.

The file import may take several minutes to complete. Click the  **Commit to database** toolbar button to save the files to the One Identity Manager database.

NOTE: There are separate language packs for each module and each language, allowing you to install the required translations for the modules you have installed. Repeat this import process for each language pack to want to install.

Once the language files are imported into One Identity Manager, there are no additional steps required to configure the web portal to display in a different language. The web portal will display in the current browser language. For information on installing the web portal, see the *One Identity Manager Installation Guide*.

Importing language files into Data Governance Edition

To import an available language

- Copy the culture folder with the localized dlls into the Data Governance Server installation SoftwareLoader folder (%ProgramFiles%\One Identity\One Identity Manager Data Governance Edition\Server\SoftwareLoader).

One Identity solutions eliminate the complexities and time-consuming processes often required to govern identities, manage privileged accounts and control access. Our solutions enhance business agility while addressing your IAM challenges with on-premises, cloud and hybrid environments.

Contacting us

For sales and other inquiries, such as licensing, support, and renewals, visit <https://www.oneidentity.com/company/contact-us.aspx>.

Technical support resources

Technical support is available to One Identity customers with a valid maintenance contract and customers who have trial versions. You can access the Support Portal at <https://support.oneidentity.com/>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Ticket
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to videos at www.YouTube.com/OneIdentity
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product
