

One Identity Starling Two-Factor Authentication

Release Notes

January 2021

These release notes provide information about the One Identity Starling Two-Factor Authentication release.

About this release

One Identity Starling Two-Factor Authentication is designed to support non-federated applications and applications that act as an Identity Provider (IdP), to accept a one-time password (OTP) for two-factor authentication. It provides OTP by SMS, phone call or Starling 2FA app. It also supports push notifications, where users receive approval requests on their Starling 2FA app for two-factor authentication. An application that uses Starling Two-Factor Authentication is able to validate OTP and redirect all OTP and push notification management workflows to Starling Two-Factor Authentication. Starling Two-Factor Authentication provides a single interface for two-factor authentication.

New features

New features in Starling Two-Factor Authentication:

- As an S2FA admin, I can change Starling accounts.
- As an S2FA admin, I can see a redesigned **Dashboard** page.
- As an S2FA admin, I can see a redesigned **Collaborators** page.
- As an S2FA admin, I can see a redesigned **Users** page.
- As an S2FA admin, I can see a redesigned **Approvals** page.
- As an S2FA admin, I can see a redesigned **Settings** page.
- Name of logged in user is shown in the Starling Two-Factor Authentication **Dashboard** instead of email address.
- The term *Starling account* is changed to *My Services* in the Starling Two-Factor Authentication **Dashboard**.
- As a Starling Two-Factor Authentication admin, I can no longer see the list of registered devices for a user in the Starling Two-Factor Authentication **Dashboard**.
- As a Starling Two-Factor Authentication admin, I can see user display names in the list of users in the **Dashboard**.
- As a Starling Two-Factor Authentication admin, I can no longer see the health check option for a user in the **Dashboard**.
- Token Response gets disabled if the user is deleted.
- Interactive phone call option is disabled when **Phone Calls** is set to **OFF** in dashboard settings page.

New features in Starling Two-Factor Authentication in the previous releases:

15 July 2018

- In the Starling 2FA Users pane, the **Add Users** dialog box displays the updated list of available country codes.

01 July 2018

- The licensing information displayed in the Starling 2FA Dashboard now includes information about hybrid subscriptions.

17 June 2018

- The Starling 2FA Dashboard displays the logged in user name instead of the email address.

25 April 2018

- A Starling 2FA administrator is able to view the invited collaborators.
- A Starling 2FA administrator is able to resend an invitation to a collaborator.

15 March 2017

- A Starling 2FA administrator is able to change the name of the token in the Starling 2FA app.
- A Starling 2FA administrator is able to select and decide if new users must receive an SMS with a link to download the Starling 2FA app.

Table 11: Browser requirements

Browser	Minimum OS / Platform	Version
Internet Explorer®	Windows 7	11
Google Chrome™	<ul style="list-style-type: none">• Windows 10• Android• Mac OS X Yosemite	Latest
Mozilla® Firefox®	Windows 8.1	Latest
Microsoft Edge	Windows 10	Latest
Safari®	<ul style="list-style-type: none">• Mac OS X Yosemite• IOS 8	See OS / Platform
Opera™	<ul style="list-style-type: none">• Windows 7• Mac OS X Yosemite	Latest

Product licensing

Use of this software is governed by the Software Transaction Agreement found at <http://www.oneidentity.com/legal/sta.aspx> and the SaaS Addendum at <http://www.oneidentity.com/legal/saas-addendum.aspx>. This software does not require an activation or license key to operate.

Accessing the service

For instructions regarding accessing Starling Two-Factor Authentication service, see the *One Identity Starling Two-Factor Authentication Administrator Guide*.

Globalization

This section contains information about installing and operating this product in non-English configurations, such as those needed by customers outside of North America. This section does not replace the materials about supported platforms and configurations found elsewhere in the product documentation.

This release is Unicode-enabled and supports any character set. In this release, all product components should be configured to use the same or compatible character encodings and should be installed to use the same locale and regional options. This release is targeted to support operations in the following regions: North America, Western Europe and Latin America, Central and Eastern Europe, Far-East Asia, Japan. It supports bidirectional writing (Arabic and Hebrew). The release supports Complex Script (Central Asia – India, Thailand).

About us

One Identity solutions eliminate the complexities and time-consuming processes often required to govern identities, manage privileged accounts and control access. Our solutions enhance business agility while addressing your IAM challenges with on-premises, cloud and hybrid environments.

Contacting us

For sales or other inquiries, visit <https://www.oneidentity.com/company/contact-us.aspx> or call +1-800-306-9329.

Technical support resources

Technical support is available to One Identity customers with a valid maintenance contract and customers who have trial versions. You can access the Support Portal at <https://support.oneidentity.com/>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to-videos at www.YouTube.com/OneIdentity
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product

Third-party contributions

This product contains some third-party components (listed below). Copies of their licenses may be found at referencing <https://www.oneidentity.com/legal/license-agreements.aspx>. Source code for components marked with an asterisk (*) is available at <http://opensource.quest.com>.
