

One Identity Quick Connect for IBM RACF 1.3

Release Notes

October 2017

These release notes provide information about the One Identity Quick Connect for IBM RACF release.

- About One Identity Quick Connect for IBM RACF® 1.3
- New features
- Resolved Issues
- Operating constraints
- System requirements
- Product licensing
- Getting started with Quick Connect for IBM RACF® 1.3
- Globalization

About One Identity Quick Connect for IBM RACF® 1.3

With Quick Connect for IBM RACF® you can synchronize data between a RACF system and other data systems to which Quick Connect Sync Engine is connected.

Quick Connect for RACF is distributed as an option of the Quick Connect Sync Engine.

For complete product information, refer to the One Identity Quick Connect for IBM RACF® 1.3 Installation and Configuration Guide.

For additional information and guidance on One Identity Quick Connect, please refer to the documentation on http://support.oneidentity.com/

Quick Connect for IBM RACF 1.3 is a minor release, with enhanced features and functionality. See New features and Enhancements. Quick Connect for RACF version 1.3 has been rebranded for One Identity.

New features

New features in Quick Connect for IBM RACF® 1.3:

• This version of Quick Connect for RACF supports the Quick Connect Sync Engine version 5.5 that allows you to directly synchronize identity information between Active Directory® and connected systems.

Resolved issues

The following is a list of issues addressed in this release.

Table 1. General resolved issues

Table 1: General resolved issues

Resolved issue	Issue ID
The connector has a built-in timeout value of 30 seconds for LDAP searches. This could cause slow searches to time out.	2342336
Resolution: A configurable timeout value can now be set. To change from the default value of 30 seconds, do the following:	
Edit the file <your files="" folder="" program="">\One Identity\Quick Connect \RACFConnector\ConnectorConfig.xml</your>	
Add the following lines just before the which appears on the last line of the file	
<pre><selfconfig> <connectiontimeout>30</connectiontimeout></selfconfig></pre>	
Replace the number 30 with the required timeout value in seconds. This configuration file is read every time an LDAP connection is made. If the value	

is changed, it will be picked up the next time an LDAP connection is made.

The SDBM LDAP Directory Server has a built-in search limit of 4096 records so

5470 sites with more than this number of users may experience a problem.

Resolution: Split the search into sub-searches to retrieve fewer records and avoid hitting the limit.

Resolved issue	Issue ID
When resetting a user's pass phrase with the connector, the account was automatically marked as expired.	5598
Resolution: Do not expire user accounts when resetting the pass phrase attribute.	

Operating constraints

The following is a list of operating constraints known to exist at the time of this Quick Connect for IBM RACF® release:

Table 2. Operating constraints

Table 2: Operating constraints

Known issue	
Length of user and	There is a limit of 8 characters for user and group names on
group names	RACF (attribute racfid).

System requirements

Before installing Quick Connect for IBM RACF® version 1.3, ensure that your system meets the following minimum hardware and software requirements.

Hardware requirements

Table 3: Hardware requirements

Requirement	Details
Processor	1 GHz or faster, x32 and x64 architecture is supported.
Memory	512 MB of RAM; 1 GB or more recommended.
Hard Disk Space	250 MB or more of free disk space. The amount of required hard disk space depends on the number of objects being synchronized.
Operating System	Your computer must run one of the following operating systems (32 or 64-bit edition):

Requirement Details

- Microsoft® Windows Server® 2008, Standard or Enterprise, with or without any Service Pack.
- Microsoft® Windows Server® 2008 R2, Standard or Enterprise
- Microsoft® Windows Server® 2012, Standard Edition
- Microsoft® Windows Server® 2012 R2, Standard Edition

Software requirements

Table 4: Software requirements

Requirement	Details
Software	The IBM RACF $^{\circledR}$ connector is intended for synchronization against the following RACF versions:
	IBM mainframe running z/OS 1.8 (and RACF 1.8) or later.
Additional	RACF LDAP Directory Services (installed and configured)
software	LDAP Service Account on your RACF Server with permissions to modify other users and groups.
Quick Connect Sync Engine	Supported with Quick Connect Sync Engine version 5.5.

Upgrade and compatibility

Quick Connect for IBM RACF $^{\circledR}$ 1.3 is not compatible with any previous version of the Sync Engine. Any previous version of Quick Connect for RACF must be uninstalled first before installing the new version.

Product licensing

There is no licensing requirement for Quick Connect for IBM RACF® 1.3.

Getting started with Quick Connect for IBM RACF® 1.3

Installation instructions

The Quick Connect for IBM RACF® 1.3 release package includes:

- One Identity Quick Connect for IBM RACF® version 1.3
- One Identity Quick Connect for IBM RACF $^{\!(\!R\!)}$ version 1.3 Installation and Configuration Guide

For full details of installation pre-requisites and installation instructions, please refer to the One Identity Quick Connect for IBM RACF® 1.3 Installation and Configuration Guide.

One Identity Quick Connect for IBM RACF® 1.3 database attributes

This section lists Quick Connect for IBM RACF® database attributes and defines any changes made when writing data to or reading data from RACF.

The section contains two tables. One defining any changes made when writing attribute values to RACF and the other defining any changes made when reading attribute values from RACF.

Table 5: Writing data to RACF

RACF attribute	Description	Changes made by the connector
racfAttributes	Attributes associated with a profile.	None
racfAuthorizationDate	Authorization date - not modifiable.	N/A
racfClassName	Class name.	None
racfConnectGroupAuthority	Connect group authority.	None
racfConnectGroupUACC	Connect group UACC.	None
racfConnectGroupName	Connect group name.	None

RACF attribute	Description	Changes made by the connector
racfDatasetModel	Dataset model.	None
racfDefaultGroup	A user's default group.	None
racfGroupNoTermUAC	Group number terminal UACC.	None
racfGroupUniversal	Universal group.	None
racfGroupUserAccess	Group user access.	None
racfGroupUserids	Group userIDs.	None
racfhavePasswordEnvelope	Determines whether or not a user's password has been enveloped - not modifiable.	N/A
racfid	User or Group name.	None
racfInstallationData	Installation data.	None
racfLastAccess	Date of last access - not modifiable.	N/A
racfLogonDays	Day of last login.	None
racfLogonTime	Time of last login.	None
racfOwner	Account owner.	None
racfPassPhrase	User's passphrase.	None
racfPassPhraseChangeDate	The date the user's passphrase was last changed - not modifiable.	N/A
racfPassword	User's password.	None
racfPasswordChangeDate	The date the user's password was last changed - not modifiable.	N/A
racfPasswordEnvelope	Password envelope - not modifiable.	N/A
racfPasswordInterval	Password interval - not modifiable.	N/A
racfProgrammerName	Programmer name.	None
racfResumeDate	Account resume date.	None
racfRevokeDate	Account revoke date.	None
racfSecurityCategoryList	Security category list.	None
racfSecurityLabel	Security label.	None
racfSecurityLevel	Security level.	None

RACF attribute	Description	Changes made by the connector
racfSubGroupName	Sub group name.	None
racfSuperiorGroup	Superior group.	None

Table 6: Reading data from RACF

RACF attribute	Description	Changes made by the connector
racfAttributes	Attributes associated with a profile.	None
racfAuthorizationDate	Authorization date - not modifiable.	N/A
racfClassName	Class name.	None
racf Connect Group Authority	Connect group authority.	None
racfConnectGroupUACC	Connect group UACC.	None
racfConnectGroupName	Connect group name.	None
racfDatasetModel	Dataset model.	None
racfDefaultGroup	A user's default group.	None
racfGroupNoTermUAC	Group number terminal UACC.	None
racfGroupUniversal	Universal group.	None
racfGroupUserAccess	Group user access.	None
racfGroupUserids	Group userIDs.	None
racfhavePasswordEnvelope	Determines whether or not a user's password has been enveloped - not modifiable.	N/A
racfid	User or Group name.	None
racfInstallationData	Installation data.	None
racfLastAccess	Date of last access - not modifiable.	N/A
racfLogonDays	Day of last login.	None
racfLogonTime	Time of last login.	None
racfOwner	Account owner.	None
racfPassPhrase	User's passphrase.	None

RACF attribute	Description	Changes made by the connector
racfPassPhraseChangeDate	The date the user's passphrase was last changed - not modifiable.	N/A
racfPassword	User's password.	None
racfPasswordChangeDate	The date the user's password was last changed - not modifiable.	N/A
racfPasswordEnvelope	Password envelope - not modifiable.	N/A
racfPasswordInterval	Password interval - not modifiable.	N/A
racfProgrammerName	Programmer name.	None
racfResumeDate	Account resume date.	None
racfRevokeDate	Account revoke date.	None
racfSecurityCategoryList	Security category list.	None
racfSecurityLabel	Security label.	None
racfSecurityLevel	Security level.	None
racfSubGroupName	Sub group name.	None
racfSuperiorGroup	Superior group.	None

Globalization

This section contains information about installing and operating this product in non-English configurations, such as those needed by customers outside of North America. This section does not replace the materials about supported platforms and configurations found elsewhere in the product documentation. This release is Unicode enabled and supports any character set. It supports simultaneous operation with multilingual data. This release is targeted to support operations in the following regions: North America, Western Europe and Latin America, Central and Eastern Europe, Far-East Asia, Japan.

Technical support resources

Technical support is available to One Identity customers with a valid maintenance contract and customers who have trial versions. You can access the Support Portal at https://support.oneidentity.com/.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to-videos
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product
