One Identity - Identity Manager Foundations (#IM-FND)

Course Outline

Course Outline - Identity Manager Foundations (#IM-FND)

Overview

A general overview of Identity Manager and the basic business processes of this solution framework is complemented by some insights into configuration and customization. The course is designed for individuals interested in understanding Identity Manager (IM) and Identity Governance and Administration (IGA) as an important part of the Identity and Access Management (IAM) portfolio.

An introduction to the basics of Identity Manager is preferred as a preparation for upcoming implementation projects with Identity Manager, as well as to provide new members of an IAM team with the necessary knowledge on how to use the product. The course focuses on the necessary understanding of the product and is a perfect start for new IAM and IM students.

This course is particularly suitable for students who do not require training on Identity Manager installation.

Students who have completed the One Identity - Identity Manager Implementation Certification (#IM-IC) course may wish to attend this course to gain a deeper understanding of Identity Access Governance and the Identity Manager product.

Course:	Identity Manager Foundations (#IM-FND)
Audience:	Customer, sales and Technical Sales
Language:	English
Duration:	5 days (remote)
Prerequisite:	None

Topics

- Identity Manager Overview
- Basic Functions
- Standard Web Portal Overview
- Identity Manager Deployment Structure
- Framework Security
- Configuration versus Customizing
- Database Calculation and Processing
- Roles
- IT Shop and Approval Processes
- Compliance and Attestation
- Report Subscription
- Target System Connection
- Synchronization Overview
- Connecting Basic Target Systems
- Customization
- Data Model and Schema Extensions
- Templates, Scripts
- Fulfillment Processes
- Transport and Staging

Training Course Details

Please note: Agenda, Labs and Demos show all available parts for an existing Training module. Depending on the course, . smaller parts of it might not be taught or performed. Typically, suitable Labs must be taught but Demos could be selected during a training

Topics	Labs	Demos
Identity Manager Overview Training Module: IM-BOA • About One Identity • One Identity Framework • Solution Framework of Identity Manager • Core Business Feature Overview • Technical Details	• Create two full manageable person objects • Managing business resources	• -
Standard Web Portal Overview Training Module: IM-BWP • Deployment Structure and Tools • Feature Set and Business Integration • Operations Web	• Operations Web	• Web Portal Introduction
Identity Manager Deployment Structure Training Module: IM-BDS • Framework and Front Ends - Web Application • Framework and Front Ends - Operational Front Ends • Identity Manager Service (Job-server)	• -	• Web-application walkthrough • Connection string • Installation review admin workstation • Manager walkthrough • IM Job-service walkthrough
Framework Security Training Module: IM-SEC • The Identity Manager Security Model • Password Management • Database Access Scenarios • Data and Transaction Security • Authentication Modules and Logging	• Add Permission and Application Role	• -
Configuration versus Customizing Training Module: IM-BCO • Configuration • Customizing	-	• Configuration Walkthrough
Database Calculation and Processing Training Module: IM-DBQ • Purpose and meaning of the DBQueue • Structure and main function of the DBQueue Processor • Troubleshooting	-	• -

Topics	Labs	Demos
Roles Training Module: IM-ROL • Roles in Identity Manager - Overview • Business and System Roles • Application Roles	• Working with roles	• Role and permission Walkthrough
IT Shop and Approval Processes Training Module: IM-BIT • Fundamentals and Data Structures • Approval policies and workflows	• Shop Configuration and Administration	• IT Shop Structure Review
Compliance and Attestation Training Module: IM-BCA • Compliance • Attestation & Re-certification • Review, Questions and Answers	• Preventive and detective Compliance • Attestation and Recertification • Simple Active Directory Group Attestation	• -
Report Subscription Training Module: IM-BRP • Reporting Capabilities • Report Subscription • Identity Manager Info System (Statistics) • Create a New Simple Report	• Report Subscription • Create and Attach Report	• Reporting Feature Walkthrough
Synchronization Overview Training Module: IM-BSC • Provisioning vs. Synchronization --- Interface vs. Connector • Connector and Connected System Module • Interface Development • Synchronization Engine and Synchronization Editor • Provisioning	• Import of Authoritative Resources	• Target System Synchronization Configuration • IT-Operation-Data Walkthrough • Account-Definitions
Connecting Basic Target Systems Training Module: IM-CBS • Connection and Reconciliation • Provisioning Processes	• Connecting Basic Target Systemes.pdf • New Hire Provisioning in Active Directory	• -
Data Model and Schema Extensions Training Module: IM-DSE • Identity Manager Schema Overview • Unified Namespace Concept • Database Schema Extension	• Simple Schema Extension	• Database Schema Walkthrough • UNS Walkthrough

Topics	Labs	Demos
Templates, Scripts **Training Module: IM-BTS** • Templates and Format Scripts • Scripts • VB.NET Basic Code Samples	• Using System Debugger • Person Export Script	• Change Template Internalname • Schema Editor for Templates
Walkthrough Fulfillment Processes **Training Module: IM-BFP** • Fulfillment processes • Process monitoring	• Create a Fulfillment process	• Fulfillment process walkthrough • Jobqueue Info walkthrough
Transport and Staging **Training Module: IM-TRP** • Change Label and Change label Management • Transport • Staging	• -	• Change label and Transport
