

Course Outline - Identity Manager Implementation Certification (#IM-IC)

Course Outline

Course Outline - Identity Manager Implementation Certification (#IM-IC)

Overview

Emphasis is placed on installing and configuring Identity Manager and loading data into the database. In addition, students will see some basic business processes of this solution framework. The course is designed for individuals interested in implementing, configuring and customizing Identity Manager (IM) as part of an Identity Governance and Administration (IGA) solution as part of an Identity and Access Management (IAM) portfolio.

This heavily lab-based Identity Manager training focuses on preparing for upcoming implementation projects. This course also focuses on providing insight into the work of end users to enable more valuable communication during the planning phase of an IGA project. This course is particularly suitable for students who need training on the installation and configuration of Identity Manager.

Students who have completed the One Identity - Identity Manager Foundations (#IM-FND) course may wish to attend this course to gain a deeper technical understanding of Identity Manager by getting their hands dirty in many lab exercises.

This course is a mandatory part of the One Identity - Identity Manager - Technical Specialist implementation certification.

Course:	Identity Manager Implementation Certification (#IM-IC)
Audience:	Partner, Implementation Professional and Technical Sales
Language:	English
Duration:	5 days (remote)
Prerequisite:	None

Topics

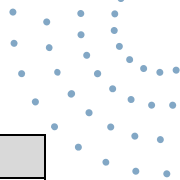

- Introductions
- Course Learning Objectives & Agenda
- Product Overview
- Installation and Configuration
- Deployment Structure
- Configuration versus Customizing
- Basic Synchronization Configuration
- Basic Framework Security
- Connecting Basic Target Systems
- Working with Roles
- Basic IT Shop and Approval Processes
- Basic Compliance and Attestation
- Basic Report Subscription
- Basic Templates and Scripts
- Data Model and Schema Extensions
- Basic Fulfilment Processes
- Transport and Staging
- Deployment Planning

Training Course Details

Please note: Agenda, Labs and Demos show all available parts for an existing Training module. Depending on the course, smaller parts of it might not be taught or performed. Typically, suitable Labs must be taught but Demos could be selected during a training

Topics	Labs	Demos
Identity Manager Overview Training Module: IM-BOA <ul style="list-style-type: none"> About One Identity One Identity Framework Solution Framework of Identity Manager Core Business Feature Overview Technical Details 	<ul style="list-style-type: none"> - 	<ul style="list-style-type: none"> -
Installation and Configuration Training Module: IM-INS <ul style="list-style-type: none"> Initial and Front-end Installation Adding a Identity Manager Service Web Application Installation 	<ul style="list-style-type: none"> Add Identity Manager Service Install Web Application 	<ul style="list-style-type: none"> Initial Installation (homework)
